

BEDROCK TREE FARM

FIR NEEDLE

PRODUCTS, LLC

DOUGLAS FIR
with new spring growth.

The Douglas Fir Needles lend the grapefruit scent to the mix while the Canaan Fir Needles have a potent tangerine scent.

CONCOLOR FIR (White Fir)

The scent of the Concolor Fir needles is a very potent lemongrass scent and the Fraser Fir Needles add the apple note.

We harvest the clippings, dry, grind and blend them into all of our products for that amazing natural true scent.

CANAAN FIR (Balsam/Fraser Hybrid)

FRASER FIR

Bedrock Tree Farm fir needle products were developed out of our desire to find a use for the endless fir needle branches that are sheared to the ground and left to turn to mulch. We felt such incredibly healthy, succulent needles could be recycled and used for our benefit and enjoyment year round.

BINGO!

Soaps, Candles, Salt Scrub and more.

***Relaxing Aromatherapy Candles
Wonderfully Exfoliating Soaps and Scrub***

HOW IT ALL STARTED...

Bedrock Tree Farm

The Scent of the Season

by Dale Rappaneau Jr.

Back in 1996, after the North Cape oil spill, Tom and Angie Geary, the husband & wife duo behind Wakefield's Bedrock Farm, planted Christmas trees across 12 acres. Tom, a full-time lobsterman, thought the trees would help supplement the family's income: "For my first 10 years, lobstering had been great. It was a really healthy, rewarding way to make a living, but since 1996, inshore lobstering has dramatically changed for the worse." So the trees became Tom's next project.

The initial costs for opening the tree farm were excessive, to say the least. "It's all cash out of pocket," Tom said. "You don't go to a bank and say, 'I want to plant Christmas trees.'" More challenging still was the work, which required Tom to clear the land, plant the trees, care for them, shape them and then replant them, each consecutive year. "It's basically a full-time job with part-time pay."

All that work eventually caught up with Tom, who some years ago took a break from replanting Christmas trees. This lapse of not replanting trees for a few years led to their current limited supply of trees over 6-feet tall. On top of that, "Sandy hit in the late fall of last year, giving us a really heavy dose of salty air and a major hard winter and a wet spring," Tom said, which "combined with, right now, what I consider to be extreme drought. It kind of gave us a good kick in the [rear]." According to Tom, though, this is the last year in which Bedrock Farm has to "downplay" their Christmas trees, as that lapse ends after this coming winter season.

For other tree farms, this kind of gap in ability to produce trees would be devastating, but for Bedrock Farm, their award-winning fir needle candles keep the customers coming back.

"People used to call us up and say their tree lost its scent. Some trees have a lot of scent and some don't, it's the nature of the tree. So I told them to scratch the branches or knock the bark. Get the sap flowing, that's where the scent comes from. Finally, I told people, just buy a scented fir needle candle."

At first, Tom and Angie sold traditional Christmas tree candles made by other companies. The candles, Tom said, were okay, but nothing really extravagant or special, so they started thinking about alternatives.

"I'd come in from shearing and my arms would be covered in sap," he said. "I'd scrape my arms and get this ball of sap that smelled incredible, so we started experimenting using the actual sap in candles." After months of trying different things, Angie - "the key imagination involved," Tom said - came up with a process in which fir needles were ground to powder and then infused into a candle. "That's the most authentic thing we came up with," he said.

And most authentic it certainly is: Angie and Tom's fir needle candle won first place in the Best New Product category at the New England Made show. Now, it's sold in more than 275 stores across the New England region - "and it's growing daily," Tom said. "It was totally unexpected and a huge surprise." More importantly, the candle has become "the forefront of our business operations," he said, adding that the award "just started busting the doors down for us."

Bedrock Farm's candles also include a wooden wick - something that Tom considers note-worthy in itself - and they have included the same award-winning fir needle process in other products, such as soaps.

Individuals interested in purchasing one of these amazing candles, or learning more about the creative individuals behind them, should visit BedrockTreeFarm.com.

BEDROCK TREE FARM

BEDROCK TREE FARM

FIR NEEDLE PRODUCTS

Our candle products are made at our farm with all natural soy wax made in the USA. Soy wax is completely natural, clean burning and non-toxic, made from renewable resources which helps American farmers. The soy wax we use has no genetically modified markers present according to the manufacturers product data specification sheet. The added natural colors we use do not contain hazardous solvents or additives such as naphtha or naphthalene.

All our Body Care and Candle products contain fir needles freshly harvested at our Christmas Tree Farm along with our fir needle powder, pure essential oils, and a naturally derived fragrance combination we created here at Bedrock Tree Farm.

Our signature Fir Needle Base oil is in every scent combination for a unique-to-us product.

We are proud of our constant dedication to pure quality.

“THE” HOLIDAY CANDLE!

An award winning candle our authentic balsam fir needle candle is like no other on the market. It truly is the “tree in a jar.”

We continue to win awards. So awesome. Thank you to all.

LIBBEY STATUS JARS—LSJ

*All Libbey Status Jars have
WOODEN WICKS*

When you light our wooden wick, always use a lighter (not a match) and hold the flame at the base of the wick to get the wax started melting around the wood.

ALWAYS let candle burn long enough to get a pool of melted wax across the surface of the entire candle as shown above (approx. 1 hour). You should achieve this with every burn for best results and to avoid tunneling (common waste of wax).

Before the next lighting gently scrape the top ridge of the wick with a wick dipper or non-flammable tool to remove the charred wood. In some cases if the flame isn't vigorous enough for you, remove a small amount of wax to allow more wood to be exposed and you will get that bigger flame.

We do not label around the column of the jar so that you can enjoy watching the wood flame. After each burn, you can wrap a damp paper towel around a tool and wipe the inside of the jar clean for a clear view of the next burn.

FIR NEEDLE SCENT IN HOLIDAY COLORS.

FIR NEEDLE GREEN

FIR NEEDLE BURGUNDY

TUREEN JARS—TJ

All Tureen Jar Candles have lead-free, cotton braid with paper core wicks.

For best results always trim cotton wicks to 1/4" and burn long enough to create a 1/4" deep melt pool all the way across the top of the candle each burn. Always light all wicks together.

20 oz., 10 oz., and 6 oz. tureens are triple-wicked. 3.5 oz. tureens are double-wicked.

On average you can expect to get 6-8 hours of burn time per net weight oz. of the candle. Burn all wicks every time.

MASON JARS— MJ

16 OZ.

8 OZ.

All mason jars have a single cotton wick.

1.25 OZ.

The Mini Mason Jars are shipped in crushproof shipping/display boxes. Fold the lid flap and tuck in to back for nice display. Order in multiples of 12 (you can mix scents)

This little 1.25 oz. jar has a big burn time. Every test result is 10 hours or longer.

CANDLE TINS—CT

16 and 8 oz. tins are triple wicked. 4 and 2 oz. tins are single-wicked.
16 oz. tins are stocked in the fir needle natural option only.
All tins except the 2 oz. have clear plastic window lids.

Metal cover single cotton wick. Candle Tins are shipped in crushproof shipping/display boxes.
Order in multiples of 12.
Mix and match scents.

GALVANIZED PAILS—P

*Both 12 oz. and 3 oz. pails have wooden wicks.
We place a clear dust cover on top and a warning to remove it before lighting on the back.*

These pails will not rust even if left outdoors for years.

We make every effort to assure that the pails don't leak, however, it is wise to burn on a surface that is safe to assure no damage in case it does.

LIBBEY TUMBLER-LT7

We added this glass tumbler to our line as a simple, economical option. It has a single cotton wick.

Tumbler measures 4" height x 2 3/4" top x 2 1/2" bottom. It holds approx. 7 oz. of soy wax and average burn time is 40-50 hours.

The sturdy molded plastic see-through cover snaps down inside the jar like an inverted cap.

100% SOY WAX VOTIVES—2 oz.

Votives are hand poured in frosted votive glasses with a cotton wick. Each votive has a labeled clear dust cover.

Votives and Melts are shipped in crushproof 12-pack shipping/display boxes. Fold the lid flap and tuck in to back for nice POP display with signage.

*Mix and match any scents
Order in multiples of 12 only.*

VH

SOY WAX CUBE MELTS—CMN (tarts)

(6 cubes =Net Wt.
3.5 oz Total)

Cube Melts are sold in 12-count pack minimum in the FIR NEEDLE NATURAL option only. They come packed in a pop-up card board display with signage.

To save our crop from devastation we installed a protective deer fence around the entire perimeter of our Christmas Tree fields. Fir tree buds are like candy to browsing deer.

**With the help of the
USDA, RI DEM, NATIONAL GRID, FARM CREDIT EAST, and others we installed a ground mounted
Solar Array 18.56kW(AC) System that was turned on October, 2018.
This fully supplies our electrical needs here at
Bedrock Tree Farm.**

*We strive to be a “good bee” pollinator friendly farm by planting acres of
white clover among our trees.*

(No, none of the foxes in this catalog are photo shopped in or retouched.)

*In 2016 Tom built us a magnificent 2,000 square foot, two story log building
for our candle and soap making expansion.*

NEW HOLIDAY SCENT MIX

Our new holiday mix consists of the Fir Needle Scent in Natural, Green, and Burgundy,
Bayberry, Cinnamon Rosemary, and Juniper.
When ordering, you can mix and match as desired.

BAYBERRY/FIR NEEDLE

The bayberry bush is best known for its berries, from which a wax is derived to make fragrant bayberry candles. We have accented our fir needle soy wax base with a layer of bayberry wax and bayberries combined to make a wonderfully fragrant candle to be enjoyed anytime of year.

As the story goes, a gift of a bayberry candle is an invitation to participate in the holiday ritual of lighting a bayberry candle and reciting the legendary poem which is included on the hang tag:

*“This bayberry candle comes from a friend
so on Christmas Eve burn it down to the end.
For a bayberry candle burned to the socket,
will bring joy to the heart and gold to the pocket.”*

CINNAMON/ROSEMARY/FIR NEEDLE

If you enjoy a hint of cinnamon with your herbal bouquet, this is the scent for you. We combine Cinnamon Leaf and Rosemary Essential oils with our signature Fir Needle Essential oil base to create a one of a kind aroma combination.

Bluebirds flock the back Fraser field on a warm summer day.

To offset seasonal demand we created candles that expand options for year-round sales. All Bedrock Candles are made with fir needles, fir needle powder, pure Essential Oils and small amounts of naturally derived fragrance oils. We are going one step further and adding new elements to our fir base to create refreshingly unique, fragrant candles.

NEW SUMMER SCENT MIX

Our new Summer mix consists of the Beach Rose, Lavender, Shiso, Lemongrass, Juniper, and Honeysuckle. When ordering, you can mix and match as desired.

BEACH ROSE/FIR NEEDLE

If you have ever hiked down through the evergreens to the beach, you know exactly what this candle smells like. We were inspired by a woman in Maine who when a small girl walked to the water's edge through the fir trees. As she walked, she snipped little fir branches and put them in her pockets and then plucked little wild beach rose petals and put them in her pockets as well. She took them home and put them in her dresser drawers to capture that wonderful combination of smells. When she first smelled our fir needle candle, she told us this story and thanked us for bringing back her wonderful childhood memories.

SHISO/FIR NEEDLE

Shiso is an edible herb that is used to wrap sushi! It is also known as Japanese Basil. Combining Shiso leaves with our fir needle powder and oils brings a pungent, fresh spring/summer herbal fragrance to our candle product line.

LAVENDER/FIR NEEDLE

Everybody loves Lavender. Our combination of Lavender Essential oils with our Fir Needle Soy Base is perfect for those who just read “everybody loves lavender” and said, “no, they don’t.” Ours is a unique and pleasantly surprising scent. The sprinkling of lavender buds and fir needles is especially pretty.

LEMONGRASS/FIR NEEDLE

Lemongrass Essential oil is interestingly calming and refreshing at the same time. Blended with the fir needle it makes for a great outdoor patio candle. The pail is galvanized so it won't rust.

JUNIPER/FIR NEEDLE

If you have ever walked by a juniper tree when the berries are ripe, you know what this candle smells like. They grow wild all over the Christmas tree farm so what choice did we have but to combine this early summer scent with the holiday best for a perfect fit.

HONEYSUCKLE/FIR NEEDLE

Wow! Who doesn't love the fresh, sweet smell of summer. Honeysuckle will catch your "nose" as you pass by engaging you to find where that amazing scent is coming from. It grows wild on our farm and we have been anticipating it as a part of our collection and the time is now to combine the grounding scent of the fir needle with the arousing scent of the honeysuckle bloom.

LAVENDER SCENTED PRODUCTS

By popular demand we are now offering some of our most popular body care products with added Lavender Essential oil. Immerse yourself in your lavender dream, think of a touch of the fresh outdoors and you have a Lavender Lover's best ever product.

Wrapped Soap, Liquid Hand Soap, Body Butter, Body Wash

SCRUB DISPLAY

12—6 oz. *Fir Needle Sea Salt Scrubs*
with signage and tester.

6 oz Plastic Square Jar
Spatula included in each jar.

BEDROCK TREE FARM

This fir needle sea salt scrub was created by the wife (Angie) of a lobsterman (Tom) out of need for a product that would get the unpleasant odors off their hands. His from handling bait and hers from cooking lobster. It works on any troublesome odor you might encounter...garlic, onion, sticky fingers, you name it.

To be effective, scoop 1/2 tsp of the scrub on
DRY
hands. Over the sink rub the salt, oil, and fir needle mix all over your hands and wrists for about 30 seconds. Get in those nooks and crannies of your fingers and fingernails. Then, get ready for the experience of pure bliss. Run warm water over your hands to remove the salt. You will definitely be telling your friends about this. Great for cutting boards and feet as well.

Handcrafted at our farm using Sea Salt, Caprylic/Capric Triglyceride (Coconut) Oil, Abies Balsamea (Fir) Essential oil, Abies Balsamea (Fir) Needles and Chromium Oxide (mineral pigment green).
Made in USA

Business card size information
comes with each scrub ordered.

FIR NEEDLE SEA SALT SCRUB

Our first product created out of the need to rid our hands of the smell of lobster. Tom is a 30+year career lobsterman and part time tree farmer. Long story short—we found that the fir needles combined with salt and coconut oil completely rids our hands of that fishy smell and is a must have for getting the sticky fir needle sap off our hands after a clipping marathon.

Our salt scrub is made here at our farm with pure sea salt and coconut oil with added fir needle essential oil and fresh fir needles. Most common uses are to rid hands of odors, especially after handling fish, garlic, eating wings or sticky foods. We also use it on cutting boards and sink drains.

Customers tell us they also use our scrub as a loofah rub to smooth and cleanse skin, especially feet. They comment that the oils leave your skin feeling moisturized and clean.

LIQUID HAND SOAP—CLS8

It is made with naturally saponified vegetable oils and a high level of glycerine added with no sulfates, surfactants or detergents. It is mild to the skin with great natural cleaning power.

CLS8 - 8 oz.

FIR NEEDLE LIQUID SOAP CLS8 - 8 oz.

FIR NEEDLE SOAPS

All our soaps are natural melt and pour bases and contain no detergents or sulfates.

We use fresh fir needles and dried powder, fir needle essential oil, and our own creation of naturally derived fir needle fragrance oil made with essential oils.

Our Shea Butter product ingredients include:

Cocos nucifera (Coconut) Oil
 Elaeisguineensis (Palm) Oil, Carthamus tinctorius L(Safflower) Oil, Glycerin (kosher, of vegetable origin)
 Butyrospermum parkii (Shea Butter), Purified water, Abies Balsamea (Fir) Oil, Abies Balsamea (Fir) Powder, Fragrance, Sodium hydroxide (saponifying agent) Sorbitol propylene glycol (made from vegetable glycerin) Sorbitan oleate (emulsifier), Oat protein, Titanium dioxide (mineral whitener) Chromium oxide (mineral pigment)

Fir needles were used in steam baths in the olden days so as to inhale the fir needle scented vapors.

A warm, steamy shower with fir needle soap can be very soothing.

And, of course, the powder side of the soap is a wonderful exfoliate.
